ENDOSCOPIC FENESTRATION OF THIRD VENTRICULAR CYST

Khalid N Mayah

Neurosurgeon, MB.ChB, F.I.C.Ms, Department of Neurosurgery, Al Sadir Teaching Hospital, Basrah; Iraq.

Abstract

Arachnoids cyst is a common pathology although it is rarely to be in the third ventricle. A twelve years child has a third ventricle arachnoids cyst that leads to hydrocephalus, the cyst has been fenestrated by endoscope, most of the symptoms that sustained over five years has been relieved.
