“Abstract”

Arab resources have always neglected the woman's role in Arab Islamic society in general and Thugur and Awasim in particular. They mentioned only some information regarding the most significant women but we were able to gather these information and confirm that the woman has got an important role in defending these areas side by side with the man . The woman has got courage especially in that part and the so city was based on Jihad and declaring change . This matter relates to all citizens of the society including women and infact woman confirmed that she had a great role.
